## AWARD-WINNING PRODUCT DESIGN: THE FACET COLLECTION RECEIVES RED DOT AWARD 2019 FOR HIGH DESIGN QUALITY

The Facet wall lamp, part of a range of ultra modern lighting by LIGHT-POINT, has recently won a prestigious Red Dot award for high-quality design. This product combines functionality with an intriguing asymmetric appearance.

The idea behind the Facet wall lamp, which was designed by Danish architect Lars Vejen, was to create a simple, functional and durable design, that would become a future classic in terms of lighting.

The design is based on an asymmetric extruded aluminium profile with a square-shaped back. Two different angles are cut in to shape the profile, one at the top and one at the bottom, so the dimmable LED light source spreads through the design upwards and downwards. It is suitable for both indoor and outdoor use and is available in two sizes. The design is available in either black or white versions.

The production of the Facet lamp merges industrial processes with a handcrafted finish, to achieve a streamlined product, yet one with the required attention to detail. In this way, form and function seamlessly work together to balance the overall design of the product.

## ABOUT LIGHT-POINT AS

Founded in 1995, LIGHT-POINT designs, produces and distributes innovative lighting products with an ultra modern, distinctly Danish design style. The company believe that lighting design is more than just form and function, but is concerned with how its products can enhance the environment they are in, whether that's indoors or outdoors.

The company challenges the perceptions of what good lighting design can do. Its products express a consistent approach: the quest for the ideal balance of perfect form, the latest in LED technology and something that is both aesthetically timeless and minimal. Every design LIGHT-POINT Copenhagen produces, whether it's a stick light for a bathroom, table lamps or pendants for a living room or built-in ceiling and wall lights has a unique emotive experience. Night and day. Light and dark. These contrasts are exemplified throughout the company's collection.

LIGHT-POINT Copenhagen's products are suitable for both commercial and residential markets and the company works closely with architects and designers to find the perfect solution to suit all its customers' needs.

## ABOUT THE RED DOT DESIGN AWARD

In order to appraise the diversity in the field of design in a professional manner, the Red Dot Design Award has been divided into three disciplines: Product Design, Red Dot Award: Communication Design and Red Dot Award: Design Concept. The Red Dot Award is organised by Design Zentrum Nordrhein Westfalen and is one of the world's largest design competitions. In 1955, a jury convened for the first time to assess the best designs of the day. In the 1990s, Red Dot CEO Professor Dr. Peter Zec developed the name and brand of the award. Ever since, the much-coveted Red Dot award has been the revered international mark of outstanding design quality.
