

PRESS RELEASE | 09.04.2019

THE LANTERN COLLECTION, AN INTERPRETATION OF A CLASSIC LIGHTING STYLE FROM LIGHT-POINT, HAS WON A PRESTIGIOUS RED DOT AWARD

The Lantern collection by LIGHT-POINT, a contemporary take on the classic lamp shape that dates back centuries, has just been awarded a Red Dot award for high-quality design.

“We are proud to push the boundaries in lighting design and receiving the Red Dot award for the Lantern collection is a recognition of this,” commented Ronni Gol, CEO and founder of LIGHT-POINT. He continues, “This design harnesses the latest LED technology and is both aesthetically timeless and minimal.”

The work of Danish designer Marie Holsting, the Lantern collection has a rectangular shape and a solid, black-lacquered aluminium and glass frame. It comes in wall, floor and portable table versions and has a built-in LED light source. This radiates an interplay of angles and geometric shapes that gives the collection its distinctive graphical and architectural appeal.

The wall version comes in two sizes and is also weatherproof, so is suitable for both indoor and outdoor use. Indoors, it can create a cosy and intimate lighting effect, both as a single light source or in combination with ceiling lamps. Several Lantern wall lamps can be lined up together on a wall to create a more decorative element.

The Lantern floor light, meanwhile, is an elegant option for outdoors. It creates a light-filled and calming space in the dark. It is available in sizes G1, which is 48 cm tall and G2 which is 60 cm tall and there is also a low, square version, the G3 which measures 25cm x 25cm.

The floor lights work well as decorative individual pieces or grouped together as an installation. They are also effective as secondary lighting in larger spaces such as illuminating a passageway.

ABOUT LIGHT-POINT AS

Founded in 1995, LIGHT-POINT designs, produces and distributes innovative lighting products with an ultra modern, distinctly Danish design style. The company believe that lighting design is more than just form and function, but is concerned with how its products can enhance the environment they are in, whether that's indoors or outdoors.

The company challenges the perceptions of what good lighting design can do. Its products express a consistent approach: the quest for the ideal balance of perfect form, the latest in LED technology and something that is both aesthetically timeless and minimal. Every design LIGHT-POINT Copenhagen produces, whether it's a stick light for a bathroom, table lamps or pendants for a living room or built-in ceiling and wall lights has a unique emotive experience. Night and day. Light and dark. These contrasts are exemplified throughout the company's collection.

LIGHT-POINT Copenhagen's products are suitable for both commercial and residential markets and the company works closely with architects and designers to find the perfect solution to suit all its customers' needs.

ABOUT THE RED DOT DESIGN AWARD

In order to appraise the diversity in the field of design in a professional manner, the Red Dot Design Award has been divided into three disciplines: Product Design, Red Dot Award: Communication Design and Red Dot Award: Design Concept. The Red Dot Award is organised by Design Zentrum Nordrhein Westfalen and is one of the world's largest design competitions. In 1955, a jury convened for the first time to assess the best designs of the day. In the 1990s, Red Dot CEO Professor Dr. Peter Zec developed the name and brand of the award. Ever since, the much-coveted Red Dot award has been the revered international mark of outstanding design quality.
